CONTENT

1 guidebook: first aid for children

1 kids emergency poster

1 kids emergency card

1 kids emergency pass

1 sticker sheet

1 carrying loop

CONTENT AND APPLICATION

GUIDEBOOK: FIRST AID FOR CHILDREN

This guide provides explanations about the contents and structure of the Dr. Till Kids Emergency Box, practical tips (including topics like home medicine cabinet or traveling with children), as well as action recommendations from pediatricians at the University Hospital Bonn for the most common kid's emergencies. Take your time to read through the guide so that you can react quickly and safely in case of an emergency.

KIDS EMERGENCY CARD

While the kids emergency poster is designed to place at home, this small folding card should always be with you when you are on the go (e.g. in your purse). Like in the poster, the first aid measures for swallowing/choking and resuscitation are shown in a clear and concise way. Fill in the emergency numbers specific to your country in the designated fields.

KIDS EMERGENCY POSTER

This poster shows the most important first aid measures for swallowing/choking and resuscitation in a clear and concise way. Fill in the emergency numbers specific to your country and hang the poster at home in a place that every supervisor in the family should know.

KIDS EMERGENCY PASS

The kids emergency pass provides space for important information about your child, such as allergies, emergency medication, etc. It serves the protection of your child and gives you a safe feeling if you can not be near. Put the pass in a visible place in your child's pre-school or school bag and inform your child's supervisors.

STICKER SHEET

With these colorful animal stickers, you can comfort your injured child and bring them to other thoughts. Take a closer look at the motifs with your child ...

CARRYING LOOP

This loop serves as an aid for quick opening and practical carrying of the bag. Simply attach it to the zipper of the bag using the carabiner hook. Through the applied QR code, you can directly access the emergency numbers of various countries and access the most important recommendations for action in case of emergencies. *Each bag includes one carrying loop. The colour of the carrying loop may vary.
